Never before has Oregon made such an exhibit of fruit as is to be seen on one of the tables along the east side of the payin on A long tables nearly forty feet in length raised in the center and with sicoling sides, in completely bounds in fruit which for variety, size color and fisvor can not be equaled by any other state in the Union Owing to the fact that the fair association has abolished premiums on county exhibits no such exhibits are bis year made. The state board of agriculture appointed a special dommittee consisting of J G Wright to make arrangements for collecting a state exhibit. Mr Wright elected life D P Prettymen to collect the fruit and it is not the later sen known as hard labor and perseverance that the display they can be such as a consistent of the fruit with a credit and one. EAST SUBURBAN AFFAIRS.

Reasons Why the Council Meetings Are so Long and Tedious.

Word From John E Woods-Milwankie Forgie Ahral-Fine Fru t-More Cash Meeden-Back From Seattle.

The list two ar three meelings of the common council were very long, and wearsone the time occup of being fully four hours at each a scion. A great de of a important business was transacted larger stewart has shown a desire to de it fairly and protect. He city is interests, lie certainly males an efficient proading, and least the same efficient proading officer and has the tusiness well in hand. It is no fight of his that it is a ruthings have been so but and wearing. It may be accounted for from the fact that the members and the commit least at slow about gettin, their business and the commit least at slow about gettin, their business and the record is stable. At 7 oclock Monday evening their was very little has ness in sight but at 7 30 that officer was kept howing to get them in shape to the council of the should be field with the recorder is far as possible before the meeting of the council.

AT MILWAUERE.

The old fown of Milwaukes appears to have taken a dec ded start. The old Standard flour milits that have remained title so long are once more the reem of activity. On this first floor a furniture factory has been started and sooms to be deling contained to machiner, has already the next the building and the building under the building are filled with the machinery from which was immediate the flour that gained such fame in the mines east of the mountains in early days A portion of the water power used to run the flour mills is used in the furnitire factory. It is stated that about twonly five hands will seem ployee, when the factory gets in full running order.

MEED A LITTLE MOPS CASH

The committee of Pionese Engine Company that purchased the horses for the fire department has also bought harness and had them suspended about the engine tongue so they san drop on the horses quickly. A memb r of the committee reports this are short of funds to the extent of about \$50, which they desire to taiso. A good work has been secondished and what is commenced should be finished in good shape.

Cityeland and the form as territorial sceretary of Montana had a system of keeping his secounts with the government while in the "reform" tu ines: that made the balance sheet foot up heavy ly in his favor. Of course it took a little ingentity to make the books sealed onder his system; but what is a profess ordit reformer, good for if he is not sequal to a little emergency of this kind? It was eary to charge the government with the merrices of a messenger and notice, for mervices of a messenger and porter, for although no such perions were employed the digisty of a reform administration de-manded that they should be. A heavy charge was made for repairing government furniture, on the hypothesis douisless, that it needed repairing, though it did not get it: wouchers drawn in large excess of the sums

paid for that service. As if it were not humiliation enough for a dornier to be compelled to resort to such hifts in order to run, his office properly an intermedding expert has after offensively prying about among the late secretary's books, made public the strats to which be was reduced. More than this, though he is **bow** occupying the honorable position of secretary of the democratic state central committee of a new state which party manifects, kick and low are work-ing to carry for democracy and reform he has been subjected to the indignity of arrest and forced, just at if he was not a reformer, to give bonds to answer to the charge of garbezz ement. No wonder gratic, statesmen are ready to de-Mare that liberty is a shum and freedom a soyth when the reformer, who lobors hight and day with ingenious, device to make his books balance, is treated with as little con-ableration as is bestowed upon the common

It is the valgar lack of consideration, of which this is a sample, that has peo-bled Canada with gentlemanly thieves from the United States within the past conspelled, in order, to keep from answering a co-called free country from their soles, and take up their residence in a royal province, that while it does not pretend to venerate the American eagle and scorns to colebrate the Fourth of Jury, furnishes the financial refugee with a sufe retreat.

doubt wishes that he had bethought him a sponts ago to try the invigorating effects of the Canadian climate. It is getting most too late in the season to go now. Essites a gentleman is cometimes detained by circum-is ces over which he has no control. He may, perhaps, find some consolation in the fact that Mortana is not the only one of the new states in which a prominent gentlemen is likely to be called upon to account for money that was not his own.

DEMOCRATIC PACES IN GROUGIA.

About a fortnight ugo at Euspiort, near Atlanta Ga.), a shocking outrage was committee upon burny families of peaceful Begroes. Upon a false and about rumor that the negroes were arming to attack the whites a mob of the latter organizat, and at night disited a farge number of houses occumied by negros dragged the lumintes out of ned, pre-ented bistots and guns and threat-ented instant death to any who should relist. made the regrees strip naise and then unmercifully fighted them. Two days later the Atlanta Constitution published an account of the outrage and denounced it in unsparing torns. It said: We have never recorded a more flagrant or inexpusable out-At the same time it said it had been

And since his vigorous denunciation of the entruge Mr. Grady, editor of the function, who is und to be a candidate for the United Btates schate, has received this anonymous mote, which lie prints in his paper:

If this astounding proposition should ever be enjetted our government would become a wast bureaucraty, such as France was under Napoteon the Third. Our present army of 100,000 office holders would be enormously

would be sure to be conducted at great loss. The experiment of govern-ment control of the railway system in France and other nations of continental Europe is a failure, for the governmen service is very costly, and, compared waltour American railroud service, inferior and muralishectory in every respect, "He governs best who governs least," is ascun-Bustin of successful free government, and our experience under the inter-stute com-nerce law has not as yet produced resuits commensurate with public expectation at the time of its enactment.

WESTERN LAND MORTGAGES During the national campaign last Novem-

ber the democratic press, in its hostility to the system of protection, projected the falsa-hood that the farmers' lands at the 'Ve-t were covered with mortgages; that this ion-der was increasing and that binkers sey was the invitable diffunder. The states in this \$250,000,000 was the total of such indebted ness in Illinois alone was a very gross misrepresentation, for according to the repert of the bureau of labor statistics of that state, the agreed mortgages on the agree of the cutting agreed mortgages on situated, exceptions, in which Chicago is situated, except ed) are only \$123,733,098, The worthlesses at of this partisan democratic representation of the burden borne by Western Jarms is shown by the statements of F. D. Take, for exam-tle Dukuta for what is now the two Dakotas), with 75 per ceut. of the farms mortgaged for sums amounting to \$50,000,000. In 1800 Dakota's wheat Ctop was 2,5-30,250 bushels; in 1885 it had reached Crop was 2,80,280 businets; in 1885 it had riched \$\frac{1}{2}\$,165,487 to years later it reparted it is adminshing yield of \$\text{05}\$, \$\text{25}\$, \$449 bushels. These figures etmost equal the continued product of Phylos wad Indiana after fifty years of show intertal development. Will any one doubt that takots's solvance is the cebus solely of changed countrions, whereby actions, lostend of having to wait pears for sail-reads to come to them, fight retironals built in advance and ready for the people to move in mad occupy the land? It is further argued that a most age Western lands is proof of the facts of the surmer in the future of his new ho no; he is so confident of pro-perity that he discounts the future and holdly makes a loan to have the forward by deprovements the day of pro-perity's actival. The imposition of niorigages helps, in new rich country thus demands quick development, lot only figurers not manufacturers, but the lator class. The commissioner of abor for Michigan, in his report, says that of its tolal mortgage indebtedness of nearly \$1:0,000,000, only a little more than \$61,000,000 rests upon the farmer; the remainder is carried by manufacturers, traders, etc. The commissioner access

MONEY IN PORK.

It is beginning slowly to dawn upon farmers in Oregon that there is money in raising hogs. Not the lean, almost ferocious hok-nig creatures that are best by achronic hanger; not the representative porcine animai that arouses a combination of pity and hamor as he reaches through the garden humor as he reaches through the garden fence for the fundal lay cubbage that is just beyond the reach of his clongated shout, but in plump, well-kept hogs with aristocratic moves, short legs and an unmistabable promise, or oleaginous properties that are readily turned into bard eight. There is money in hogs of this kind, because when turned into ribs, haves, bacon and land they yeld heaves and these properties that the properties when the properties when the properties with these properties when the properties with the properties when the properties with the properties when the properties were properties and the properties when the properties were properties and the properties when the properties were properties and the properties when the properties were properties the properties and the properties when the properties were properties the properties and the properties when the properties were properties the properties that the properties were properties that the propertie ily, and these products hear good prices in the market: of the Northwest the year-lound. THE INTERNATIONAL CONGRESS.

The international American congress meets at Washington next menth. Its delibert ions will be watched with attention by the people of the Pacific cons., who are deen's interested in the increase of our trade with Mexico, Central American and the South American states. The object of the south anorthean states. The object of the topic of the Wes era temisphere into closer spolitical and sommercial relations. A got vention of this sort was alternated as long ago as the administration of John Quincy Atlants, but was not favored by congress and failed of its purpose. Mr. Baine favored, such a convention when he was secretary of state to Garfield, but his recommendation never law in order to get rid of these 500,000 place men, before the government could live and move and assert effectively its being. This proposed centralization of wast industrial inimpending international American, conferimpending international American, confermove and assert effectively its being. This proposed centralization of vast industrial inferences and enterior in the control of the maintain and an enterior and approved by the fittleth congress and approved by President Cleveland a year ago, and the invitations from the state department is attrictly repugnignt to the habits of our people and at variance with American ideas. The popular will would be multiply that through bureaucratic rule as if is under the mounciliest governments of Europe. As a practical experiment, this bureaucratic control of the business of the people has proved a failure. The postal telegraph system of England is so expective that it does not pay an adequate dividend on the government's original pirchase of the telegraph business, even in so thickly entire country is Great Britain, and in our action of magnificent distances it

It is wide enough and far reaching enough to set up at the beset of he of the Atlantic a great confederacy, whose spent and expressation will policy would be hearlie to I trans. It is not diffi-cult to ingaring what a series to the role in districts ance went her asset by each a district on picture course of trade, and how much at it has the pen-rual interest of I must full the elements that are being nursed its Washington shall not success. Exauld they come to northing, they will recipily a varie confederacy founded on the principles of protection and exclusive design such as the world has tween yet seen, it would certainly throw Europe back upon methods of revenue and fances and runky which were communical loop Summer and trade which were a communed loop ago. The carelessness of those whoset fire to the woods west of this city a few days ago is worse than reprehensible. Forest fires have destroyed the "witness trees" that marked the confidery between Oregon and California by the survey made some fiften years upon him obliterating all record of the came. The Jack anville Those, says that a party that recently took the contract for surveying two town hims in Curry could. county was obliged to suspend operations a all traces of the state line had vanished. folly of leaving rothing but trees to witness the established boundary between states, would be inconceivable but for the fact that government surveyors closely re-semble other officials in that they work mainly for the money that is in the job.

Oregon's apple trees do not present a very inviting or encouraging appearance this year. Judging from the looks of the fruit your the trees and the deposit on the ground beneath them, the worms are at once feasting upon and harvesting the crop. All orchards may not be thus infected, but the greater portion of them eartsuly are, and we have yet to examine the first box of apples in the market this year that was free from the pest. It is evident that the giory of the big red apple has desarted from Or-egon unless orchardists combine in intelli-gent warfare upon these disgusting and destructive invaders.

"Corporal" Tenner has been a varyalimble and successful office-seeker despite the loss of his leas. He has lived in Brooklyn about twenty years. which will be brought here and shipped in cars to the East.

The steamer Michigan left Astoria last Monday morning for Seattle.

The local inspectors of hulls and boilers have inspected the new O. R. & N. C. 's bar tog Wallows and Issued certificates to ber. She will immediately be taken down to Astoria by Captain Hawes, who is to preside in future at her wheel while she runs on the bar at the mouth of the Columbia river.

The new steamer Mountain Queen, now being built for the O. R. & N. Co. by Mr. Hefflen, has her hulf finished and decked, while acarly all her upper work is completed. Part of the old housings are used in the work. When completed the Mountain Queen will be sortething like the sleamer T. J. Potter, though she will lack the gingorbread work that the Potter has. Everything indicates that she (the Mountain Queen) will be ready for launching by November 1st, fifteen days earlier than the contract calls for.
